Summative Assignment

Module code and title	COMP2281 Software Engineering (Team work) COMP2281 Software Engineering (Individual)
Academic year	2025-26
Coursework title	Product Presentation Individual Presentation Skills
Coursework credits	2 + 1 credits
% of module's final mark	10% (team) + 5% (individual)
Lecturer	All
Submission date*	Week beginning Monday, March 16, 2026
Estimated hours of work	4 + 2 hours
Submission method	The presentation will be delivered face to face, assessment of the group and individual will then be performed.

Additional coursework files	
Required submission items and formats	Please list the files that should be submitted, including format

* This is the deadline for all submissions except where an approved extension is in place.

Late submissions received within 5 working days of the deadline will be capped at 40%.
Late submissions received later than 5 days after the deadline will receive a mark of 0.
It is your responsibility to check that your submission has uploaded successfully and obtain a submission receipt.

Your work must be done by yourself (or your group, if there is an assigned groupwork component) and comply with the university rules about plagiarism and collusion. Students suspected of plagiarism, either of published or unpublished sources, including the work of other students, or of collusion will be dealt with according to University guidelines (https://www.dur.ac.uk/learningandteaching.handbook/6/2/4/).

COMP2281: SOFTWARE ENGINEERING 2025/26

Final Product Presentation

Overview:

You should prepare a presentation that demonstrates the final solution developed for your client. This should be pitched to the staff markers who may not be aware of your client and the project.
The presentation is worth 10% (team marks) for this module, and you will also be marked individually for your contribution to the presentation, which will be worth 5% (individual marks).

Group Presentation

Each group is expected to deliver a professional presentation that demonstrates your final solution. The presentation should last **20 minutes**, and every member of the group is expected to speak for a minimum of **3 minutes** and a maximum of **5 minutes** during the presentation.
The team marks will be broken down as follows:

1. Introduction (10%)
    - You should very briefly introduce the client and project for the benefit of staff.
2. Solution/Demonstration (50%)
    - This should be where you spend the majority of the time in the presentation. You should demonstrate all of the key system features. You may also show slides/images demonstrating the main features. Use any materials you feel will help the staff understand how the system works.
    - Explain how the final system links to the requirements specification. Have all of the features beenimplemented? Identify how the project has changed if not all of the original requirements have been met.
    - You may want to discuss how the final solution compares to the original design.
    - You may want to discuss some aspects of system testing.
3. Handover Plan (30%)
    - Identify how the project will be (or has been) handed over to the client to allow them to test the system. For example, this may involve hosting a public test server for the client, or integrating your solution into the clients current systems.
    - Explain any important aspects of the user manual that the staff (and client) will need to know in order to use and run the system.
4. Time Management and Presentation Quality (10%)
    - Your presentation should be 20 minutes long, and contain an appropriate balance of content according to the marks allocated in the above sections.
    - The presentation should be clear and easy to understand, and the visuals should be easy to read and follow.
    - Use of appropriate technical language and theoretical concepts where appropriate.

Individual marks

As well as being a team presentation, you will be marked individually on your presentation skills. When you begin talking for the first time in the presentation, you should introduce yourself for the benefit of staff. The individual marks will be broken down as follows:

1. Content/Structure (25%)
    - Your individual sections should be relevant, accurate and logically structured. You should be confident with the material you are presenting.
    - Explain technical concepts clearly at an appropriate level for staff.
2. Delivery (50%)
    - Consider issues such as body language. Make eye contact and think about hand gestures, posture etc.
    - Make sure you speak clearly and loud enough to be heard. Think about the speed and fluency ofdelivery.
    - Be prepared! Using notes is fine if they are prompts, but try to avoid just reading from notes.
    - Make your section of the presentation engaging
3. Time Management (25%)
    - Try to make sure you deliver your content at an appropriate speed; don't rush through your section,but also don't take so long that the rest of the presentation seems rushed.
